

Correspondence - 1890, June 11 to December

Dear Sir,

In regard to
mules - Mr. Shanklin
reports in regard to mules
that they are too thin
to do the work required.

He would prefer to report
further in person -

Yrs
H. H. S.

Jr. Sloan,
Dear Sir,

As the stone and sand for foundations are in place, we ought to have the lime ready.

Please let me know about this. I might make a temporary arrangement about water. Stone masons ought to be secured. One leader at about \$3⁰⁰ a day, a good workman at about \$2⁰⁰ & balance in convicts seem to me what is required - You will know better ^{than I} about wages in this vicinity. The foundations ought to be ready for the brick by the time the first kiln cools.

No good day ought to be lost between now & next Sept. if we are to open for a year students then, or we should do, and as I understand the plan is -

Yours truly,
H. West
